ENGINEERING A DIGITAL FUTURE

Expert installation and maintenance at Orange Cloud for Business

Orange Cloud for Business helps to accelerate the digital transformation of its customers with the ability to control end-to-end application performance and security from an employee and customer perspective.

Move to cloud computing and Flexible Engine platform improves the lifecycle of customer legacy and cloud IT services thanks to 70 secure Orange data centres all over the world.

BUILD AND OPERATE

Indigo installs and maintains the infrastructure cloud platform in Paris and Amsterdam data centres of Orange Cloud for Business. More than 3000 critical elements have been deployed in an impressive short timeframe utilising Indigo highly skilled field engineers.

In a high pressure Data Centre environment time to deliver is key. OCB chose Indigo because our technical expertise, our ability to be agile and our rapid response time in multiple countries.
